### **DETAILED ACTION**

1. Applicant's preliminary amendment filed on September 28, 2004 is acknowledged. Claims 3, 6-13, 17, 21, 25 and 29-35 have been amended. Claim 36 has been cancelled. Claims 1-35 and 37 are pending.

### ***Election/Restrictions***

2. Restriction is required under 35 U.S.C. 121 and 372.
3. This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-30, drawn to a technical feature of an isolated HBV variant containing a mutation in polymerase gene, a diagnostic kit and a method for detecting a HBV in a biological sample.

Group II, claim(s) 31 and 32, drawn to a technical feature of a method for detecting resistance to an antiviral drug of a HBV virus present in a biological sample.

Group III, claim(s) 33, 34 and 35, drawn to a technical feature of a method for screening for drugs against a HBV virus.

4. The technical feature of group I appears to be isolated HBV mutants. However, Stuyer et al. (*Hepatology*, Vol. 33 (2001), No. 3, pp 751-757) teaches HBV variants containing mutants in polymerase gene.

5. The inventions listed as Group I-III are not related to a single general inventive concept under PCT Rule 13.1 because, under PCT rule 13.2, they lack the same or corresponding special technical features. As set forth above, each group requires a special technical feature that is not

Art Unit: 1648

required by any of the other groups. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

6. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

7. In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained.

Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Art Unit: 1648

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
